

JOSHUA TOBONGBANUA

AI & Full-Stack Engineer

About Me

Software Developer, QA, and AI Development Lead with experience in full-stack web development, software quality assurance, automation, and AI-driven solutions. Proven track record in designing, developing, testing, and maintaining business-critical web applications that improve operational efficiency and support business growth.

Experienced in technical leadership, AI integration, workflow automation, code reviews, functional testing, deployment support, and mentoring development teams. Skilled in leveraging modern technologies and AI-powered tools to deliver scalable, reliable, and maintainable software solutions while reducing manual processes and increasing productivity.
